Professional Experience

2026 Feb – Present

Data Engineer

Remote

Orcion Systems Pvt Limited ☑

Job Description

- Design, architect, and develop scalable AWS-based ETL/ELT data pipelines in a multi-tenant data platform environment
- Build and optimize Medallion layer data processing workflows for large-scale ingestion, transformation, validation, reporting and big data management
- Provide validated data and maintain reliable workflows through QuickSight dashboards that continuously monitor data quality and workflow health

2024 Nov – 2026 Jan

Data Engineer

Lahore, Lahore

Expertflow Pvt Limited ☑

Job Description

- Build ETL pipelines on their in-house developed data platform
- Introduce additional features within the data platform to enhance the capabilities, enabling multiple teams to onboard and utilize it effectively for their operations
- Collaborate with teams to deliver required data and deploy solutions

2023 Nov – 2024 Nov

Associate Data Engineer

Lahore, Pakistan

DotLabs (Full Time) ☑

Job Description

- Developed cloud based ETLs and BI Solutions with team as per project requirements
- Lead projects and mentor junior team members, improving team efficiency.
- Engage with stakeholders and clients to address inquiries and fulfill project requirements.

Education

2016 Sep – 2020 Aug

Bachelor of Science (BSc) in Electrical and Computer Engineering

Lahore, Pakistan

University of Engineering and Technology (UET) Lahore ☑

CGPA: 3.45/4.00

Projects

Expertflow Data Platform

Apache Airflow | Data Build Tools (DBT) | Alembic | Docker/Gitlabs | Kubernetes

An in-house data platform leverages Apache Airflow to orchestrate custom ETLs, data migrations, and schema upgrades. It integrates diverse data sources with target systems through tailored transformations using DBT (Data Build Tool) while managing schema changes for new product releases. The solution is containerized with Docker, version-controlled in GitLab, and deployed on Kubernetes.

Hospi Housing

AWS Dynamo DB | Kinesis | S3 | Glue | Athena | QuickSight

Executed an ETL pipeline and business intelligence processes on AWS. The pipeline extracts live data from DynamoDB via Kinesis, transforms it using Glue scripts, and crawls into AWS Athena. It then integrates with AWS QuickSight to design dashboards that provide stakeholders with data insights.

Brainivoy ETL Pipeline

Hubspot | Python Flask | Airbyte | AWS S3 | AWS Glue

Designed and implemented an ETL pipeline from HubSpot to AWS. Utilizing the HubSpot developer portal, we built a Flask application that uses OAuth 2.0 for user authentication, extracted data via Airbyte configured on AWS EC2, and created a data lake on AWS using S3 and Glue jobs.

Meal Project ETL

Azure Blob Container | FunctionApp | SQL Server | PowerBI

The Meal Project is a cloud-based ETL solution hosted on Azure. It efficiently manages raw data stored in a blob container, processes the data using Function Apps, and ingests the results into a SQL Server database. This processed data is then connected to Power BI, where a report is generated to provide valuable insights.

Skills

Python

Data Science, Engineer and custom apps

Data Science & Machine Learning

numpy, pandas, matplotlib, seaborn, scikit-learn, keras

Databases

PostgreSQL, MSSQL, MYSQL, MongoDB, DynamoDB

Azure Cloud

Blob Storage/Management, FunctionApp, SQL Server

Version Control

GitLab

Data Engineering

ETL Pipelines, Apache Airflow, Airbyte, Docker, Kubernetes, DBT, Alembic, Apache Iceberg, Spark

Data Scraping

Python Selenium, BeautifulSoup

Amazon Web Services (AWS)

EC2, S3, Lambda, App Sync, VPC, API Gateway, Kinesis, Glue, Athena, QuickSight

BI Tools

AWS QuickSight, Looker Studio, Power BI, Apache Superset

JIRA

Task Management & Confluence Documentation

Languages

• Urdu

• English

• Punjabi

Certificates

Python for Everybody (Specialization)

Basics, Data Structures, Web Scraping, Databases

Introduction to Deep Learning & Neural Networks with Keras

Deep Learning Neural Network Architecture, Classification, and Regression with Keras

Machine Learning with Python

Supervised and Unsupervised Learning models (Theory + Code)

AWS Cloud Technical Essentials

VPC, EC2, ECS Fargate, Lambda, S3, CloudWatch

Interests

• Strength training

• Badminton & Football

• Console gaming (PC,Xbox,PS)
