Basic Image Classification with
TensorFlow

Introduction to Deep Learning &
Neural Networks with Keras

Introduction to Programming with
MATLAB

Samiullah Arshad

Data Engineer | Building Scalable Data Platforms, ETL/ELT &
Analytics Solution | Python & SQL | AWS/Azure Data Architect
Lahore District, Punjab, Pakistan

Summary

A Data Engineer with expertise in designing and implementing scalable data pipelines, analytical BI Solutions and data platforms. Leveraging tools like Apache Airflow, Airbyte, and AWS/Azure services, I specialize in turning complex data into actionable insights. My expertise includes building efficient ETL workflows, automating data pipelines, and delivering cloud-based analytical BI solutions that align with organizational goals.

I have successfully delivered projects ranging from ETL pipeline and BI solution hosted on AWS to orchestrating batch processing workflows that store and maintain data within databases from various sources. My expertise extends to API integration, DevOps practices, and mentoring teams for enhanced productivity. I am adept at collaborating with stakeholders to deliver actionable insights and solutions that meet diverse project needs.

Experience

Orcion Systems

Data Engineer

February 2026 - Present (7 months)

Responsibilities

1. Design, architect, and develop scalable AWS-based ETL/ELT data pipelines in a multi-tenant data platform environment
2. Build and optimize Bronze, Silver and Gold (Medallion Architecture) layer data processing workflows for large-scale ingestion, transformation, validation, reporting and big data management
3. Provide validated data and maintain reliable workflows through QuickSight dashboards that continuously monitor data quality and workflow health, giving the client confidence in data accuracy while ensuring smooth and consistent operations.

Product

DataExtend (DEX)

DEX is a multi-tenant AWS data platform that securely ingests data from multiple sources through AWS Batch, processes large-scale datasets using AWS Glue and Spark, and delivers reliable data snapshots to dedicated client environments. Data quality and workflow health are continuously monitored through Amazon QuickSight, providing clients with confidence in data accuracy, supporting informed decision-making, and enabling proactive monitoring and rapid troubleshooting.

Expertflow - livechat, video, callcenter SW

Data Engineer

November 2024 - January 2026 (1 year 3 months)

Pakistan

Responsibilities

- Build efficient and scalable ETLs & data pipelines on their in-house developed data platform
- Introduce additional features within the data platform to enhance its capabilities, enabling multiple teams to onboard and utilize it effectively for their operations
- Collaborate with teams to deliver and inspect required data and deploy solutions

Product

Data Platform

An in-house data platform leverages Apache Airflow to orchestrate custom ETLs, data migrations, and schema upgrades. It integrates diverse data sources with target systems through tailored transformations using DBT (Data Build Tool) while managing schema changes for new product releases. The solution is containerized with Docker, version-controlled in GitLab, and deployed on Kubernetes.

DOT LABS

Associate Data Engineer

November 2023 - November 2024 (1 year 1 month)

Lahore

Responsibilities

- Developed cloud based ETLs and BI Solutions with team as per project requirements
- Lead projects and provide mentorship to junior team members, improving team efficiency.
- Engage with stakeholders and clients to address inquiries and fulfill project requirements.

Projects Portfolio: <https://docs.google.com/document/d/1txTU7K58IOnfOdFnmzdwI8BdNsLm1MlyvnoOoPeMDBE/edit?tab=t.cea00o6m806e#heading=h.67yg8huxojwf>

Fiverr

R/Python Developer

October 2020 - November 2023 (3 years 2 months)

Responsibilities

- Complete projects related to Data Analytics, Machine learning, Web scrapping, Web Application and custom programs using R & Python
- Provide assistance in code debugging and troubleshooting in different frameworks
- Gig Link: https://www.fiverr.com/sami_276

Projects

Some of my completed projects are listed below

Using R

- A cricket player analysis dashboard that provides the performance ratings and category of a particular player (RShiny)
- Prediction of CO2 Emission from automobiles across Europe using Linear Regression
- Video games sales behavior prediction based on different features (platform, genre, publishers etc) using Machine Learning models i.e., SVM, Decision Trees and Random Forests

Using Python

- Prediction of customers behavior in a laundry shop using classification model
- Classifying Images from MNIST dataset using deep learning neural networks
- Fetching weather and geographic data from API and suggesting nearby hotels using data visualization
- Fine-Tuning ChatGPT3 model using OpenAI API

LUMS Energy Institute

Associate Researcher

February 2022 - January 2023 (1 year)

Lahore, Punjab, Pakistan

Responsibilities

- Work in a team to develop energy monitoring and control applications using R and RShiny
- Assisting team members with code reviews and debugging support
- Research the trends in energy development and share them with group members using MS Office

Projects

Following are web apps I worked on using RShiny

- Generation Planning app that calculates and displays an optimized method for dispatching powerplants.
- Power Transmission and Distribution app that uses geospatial data to provide an interactive map of grids, along with descriptions.
- Load Scheduling app that monitors the ON and OFF intervals of appliances, and sends email alerts when a specific appliance deviates from its schedule.
- Air Quality Index (AQI) monitoring app that fetches data from sensors located in different regions using APIs and visualizes various parameters using an interactive map and custom charts.
- Time-series forecasting app that displays historic and forecasted values of various loads, as well as other factors like peak power, to predict their respective trends.

InfoTech Group

Field Engineer

October 2020 - November 2021 (1 year 2 months)

Lahore District, Punjab, Pakistan

-> Maintenance and Inspection of AFC (Automatic Fare Collection) system
present on the station

-> Reporting the faults on field to Shift in-charge using MS Excel

Pak Elektron Limited

Intern

July 2020 - August 2020 (2 months)

Lahore District, Punjab, Pakistan

Education

University of Engineering and Technology, Lahore

Bachelor of Science - BS, Electrical and Computer Engineering · (2016 - 2020)
